

GAS MAINS ARE TO BE LAID NORTH OF THE BRIDGE

H. V. PLATT AT HEAD OF SHORT LINE RAILROAD

What is said to be the largest proposed gas main extension in the city of Ogden is being contemplated by the Utah Power & Light company. The district to be supplied is known as the north Washington, which includes that part of the city from Ogden river bridge north.

In making the announcement last night, P. M. Parry, manager of the Utah Power & Light company, said that he felt that the north Washington district was one of the most desirable residence sections of the city and that the people living in it were entitled to the same permanent improvements that are now being enjoyed by other parts of the city.

Sufficient money has been set aside to do the work, and if enough business can be secured to warrant the expenditures, the work will proceed immediately. Ordinarily it will require approximately seven consumers per block to insure the extension free to those who want it.

Those who are interested in the installation of gas in their street should make it a point to see their neighbors and friends and guarantee at least seven consumers per block. This will help materially in getting gas in their street as early as possible.

Liberal Policy.

The same liberal policy will be followed in developing this district as is now being followed in developing other parts of the city.

First, Approximately 100 feet of main will be installed free for each consumer.

Second, Free service connection will be made from main to meter.

Third, The gas meter will be installed, read each month and maintained free of charge to each consumer.

Fourth, The monthly minimum charge is only 50c, having been reduced from \$1 in September of 1915.

The proposed distribution system will have some new features which will make it more economical and desirable than older systems.

First, no pipe threading or bolting will be necessary. Instead all pipe will be welded together in one continuous length, eliminating loss of gas through leakage, etc.

Second, Instead of employing low pressure in forcing the gas through the system, the gas will be compressed, thus insuring sufficient pressure and excellent service at the most extreme ends.

Like many other industries, the gas industry is effected quite materially by the general prosperous condition existing in all parts of the country and the company's problem now is to get sufficient pipe and appliances to supply the demand.

To overcome this as much as possible, it is advisable to place orders now so that the material can be ordered from the factory and be delivered before it is needed.

A most important consideration to the mother of today is that of supplying good nourishing meals for her children at the least possible expense.

In bringing about this result, gas has been a valuable factor. Food may be cooked in this way at a less expense than in any other way. In addition to this, the kitchen containing a gas range is clean, sanitary, and helps to cultivate in the housewife or cook that comfortable frame of mind, which must have its effect upon the preparation of meals.

The Utah Power & Light company is proud of the work which is being performed in the interest of good cooking and hopes that many will take advantage of the liberal offer to obtain the most modern and practical of domestic services. The company has planned to have a salesman, beginning with Monday, June 19, call personally at every home in the proposed district, to determine, in an approximate way, how many consumers are willing to take advantage of the special offer.

"Terrible war, isn't it?" "Frightful, Seventh Red Cross dance I've had to go to this week."

"Dad," asked the son of a Philadelphia lawyer, "just what is a test case?"

"A test case, my son," replied the father, "is a case brought to decide whether there's enough in it to justify the lawyers in working up similar cases."

There is no need of anyone suffering from superfluous fat. If you want to reduce your weight, in a simple, safe and reliable way, without starvation diet or tiresome exercise, here is a test worth trying.

Spend as much time as you can in the open air, breathe deeply and get from any good druggist a box of oil of Keweenaw capsules; take one after each meal and one before retiring at night.

Weigh yourself once a week so as to know just how fast you are losing weight and don't leave off the treatment or even skip a single dose until you are down to normal.

Oil of Keweenaw is absolutely harmless, is pleasant to take and helps digestion. Even a few days' treatment has been reported to show a noticeable reduction in weight, footpads become lighter, your work seems easier and lighter and more buoyant feeling takes possession of your whole being.

Every person who suffers from superfluous fat should give this treatment a trial, there is nothing better. A. R. McIntyre Drug Co.—Advertisement.

H. V. Platt, assistant general manager of the Southern Pacific at Los Angeles, will succeed E. E. Calvin as vice president and general manager of the Oregon Short Line July 1, when Mr. Calvin will become president of the Union Pacific.

Official announcement of the appointment of Mr. Platt was made last night in Los Angeles by Mr. Calvin. At the same time the appointment was announced in Los Angeles Mr. Calvin sent a telegram to local officials of the Oregon Short Line naming his successor. According to Mr. Calvin's wire, Mr. Platt also will become vice president of the Union Pacific Railroad company. He will assume his new duties in Salt Lake, July 1.

Mr. Platt is well known among the older railroad men of the intermountain country. He began his railroad career thirty-two years ago as a brakeman on the Oregon Short Line and was promoted from time to time until he became superintendent of the Utah division, with headquarters in Salt Lake City. Eleven years ago he was transferred to the Southern Pacific as division superintendent. Later he was promoted to the position of general superintendent and subsequently to the post he now holds.

Arrangements were made yesterday at a meeting of the Ogden branch of the Utah Manufacturers' association held at the Weber club, for four delegations of its members to leave Ogden Tuesday night, June 20, for Brigham City, Wellsville, Logan and Preston, respectively. They will take quarters in the towns named for the night, and will return to Ogden the following morning on the special Ogden, Logan & Idaho railroad train that will carry the merchants of northern Utah and southern Idaho to this city, to be guests of the association.

This plan was decided upon in order to inculcate the Ogden spirit into the visitors as early in the day as possible and the local manufacturers who make the trip north expect to escort the parties from their assigned districts into the city in the right mood to enjoy to the fullest extent the program of the day.

At the meeting yesterday, Fred G. Taylor was selected to be toastmaster at the banquet to be tendered the visiting merchants at the Hermitage hotel in Ogden canyon, on the evening of June 21. While this event is in progress, five entertainers will give a program and their will be 2 minute talks by representatives from each city located on the interurban railway line. It is anticipated by the invitation committee that from 200 to 250 northern merchants will participate in the festivities of the day and evening.

STATE TREASURER'S REPORT MADE

Salt Lake, June 16.—The state of Utah expended \$2,743,593.03 during the six months ended May 31, 1916, and had a cash balance on hand in all funds that date of \$3,254,388.26, according to a semi-annual report to the governor submitted yesterday by State Treasurer Jesse D. Jewkes.

Of the total cash balance, however, only \$105,864.93 remained in the general fund, which supplies most of the expenses of running the state government, the treasurer's report indicates as great a need of economy as that of State Auditor Kelly, issued last week.

The two reports, in fact, contain much of the same information, the principal difference being that the treasurer's report on finances is computed on the number of state warrants issued up to May 31 and the auditor's upon the warrants issued and returned as paid. The difference is comparatively small, as the number of outstanding warrants was not large.

The treasurer's report shows the total receipts to the general funds for the past six months were \$1,206,032.19. Fees collected by state officials amounted to \$215,722.45, and by state boards and institutions, \$18,172.96.

Receipts from inheritance taxes in the six months were \$98,566.07, of which amount \$36,091.64 was from Utah estates and \$62,769.43 from foreign estates.

The sale of automobile licenses yielded \$54,349.35 to the state. Sales of fishing and hunting licenses and fines brought in \$14,336.75.

The state road fund contained \$266,722.30, apportioned to the various counties on May 31. Salt Lake's apportionment was \$47,535.72.

The district school fund contained \$532,402.93, and the high school fund \$88,661, which is to be apportioned this week. The University of Utah maintenance fund showed \$161,611.06 and the Agricultural college fund \$72,896.64.

SHOULDER BROKEN

Salt Lake, June 16.—Walter E. Cluff, 39 years of age, residing at 2288 Windsor street, Salt Lake, an agent for the Kansas City Insurance company, whose local offices are in the Atlas block, is in a Twin Falls, Idaho, hospital suffering from a badly broken shoulder blade, the result of an auto accident which occurred near Buhl, Idaho, at 2 o'clock yesterday afternoon.

At the same time that Mr. Cluff was injured John and Jesse Hewlett, brothers, who reside near Twin Falls, received injuries that are held to be even more critical. It is believed that John Hewlett cannot recover and Jesse suffered a fracture of the skull near the base of the brain.

A New "Thrill" for Men

Here's a new idea, Men. Most of you wear two or three straw hats in a season. If you pay \$2 to \$5 each for them it makes it a bit expensive. In order that you might have three or four straw hats during the summer—if you want them—we have bought a wonderful assortment which will be sold at \$1.45. They're worth more than that, you understand, but we figure that if we can sell you two or three during the season our profit will be fully as much and your expense will be considerably less.

We know you'll like the hats. How do you like the idea? Come in tomorrow and see the good looking "straws" we have for you at \$1.45.

MEN, HERE'S THAT GOOD \$15 SUIT

We're hearing a good many compliments these days, about the men's suits we sell at \$15. It's the biggest value we have ever offered. They're made in all of the new fabrics—fancy mixtures or plain serges.

And there's an advantage in buying them ready to wear. You may try them on—see just how they will look and how they will fit.

No advance deposit is asked—be sure you're satisfied first as to material, workmanship and fit—and then pay for the suit—\$15, if you're pleased.
